

2021 Mountain State Assessment of Trends in Community Health (MATCH)

CLAY COUNTY FINDINGS

MATCH is a statewide survey designed to understand the health of West Virginia adults and to match community health needs with resources specifically designed to meet those needs.

Most Clay County adults said they were in good health:

About **2 out of 3 (66%)** said they had good to excellent general health.

Almost **4 out of 9 (43%)** said someone in their household was on Medicaid, and more than **1 in 3 (35%)** said they were on Medicaid.

But some also reported physical health challenges:

Almost **3 in 8 (36%)** said they experienced chronic pain.

About **1 in 3 (33%)** had diabetes.

And not always engaging in healthy activities:

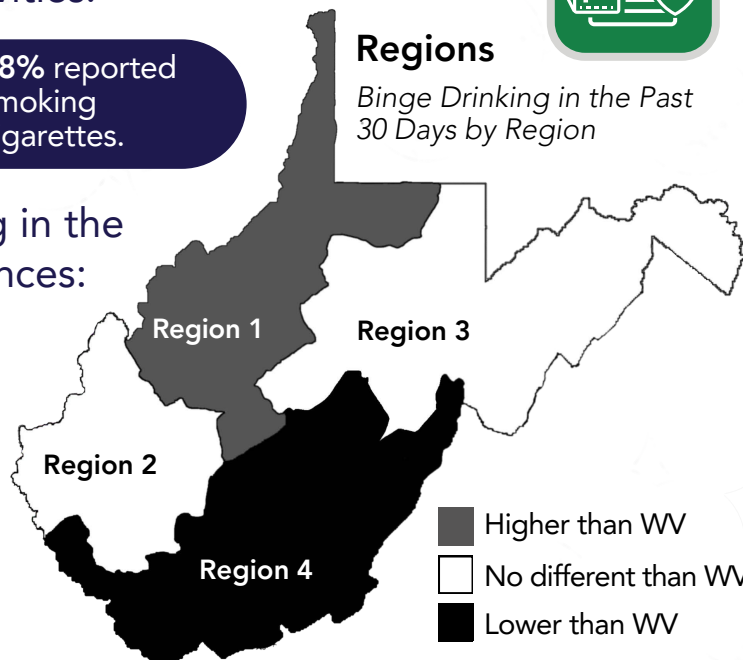

More than **2 in 5 (42%)** had not engaged in exercise in the past 30 days.

28% reported smoking cigarettes.

While some reported unhealthy drinking in the past 30 days, most had not used substances:

- **21%** in Region 1 reported binge drinking.
- **9%** in Region 1 reported heavy drinking.
- **72%** in Clay County had not drunk alcohol in the past 30 days.
- **82%** in Clay County had not used drugs in the past 12 months.

Most Clay County adults said they had good mental health:

More than **2 out of 3 (69%)** reported good to excellent mental health.

But also reported economic challenges:

More than **1 in 4 (28%)** reported paying for housing got harder in the past 12 months.

Almost **3 in 8 (36%)** said buying food got harder in the past 12 months.

And some reported mental health challenges:

More than **1 in 4 (27%)** said they had needed mental health care in the past 12 months.

Almost **1 in 3 (32%)** said they ever thought about, planned, or attempted suicide.

Notes about MATCH: Between August 2021 and February 2022, the MATCH survey was administered by WVU Health Affairs Institute and funded by the WV Department of Human Services,* with input from the WV Department of Health,* to 88,004 adults across all WV counties, and 20% (16,185) responded. The results have been weighted and are representative of all WV adults. For more information, visit **WVMATCHSurvey.org**.
